

Green Airport Fleets Workshop and Expo

January 26, 2010 – 8:30am to 4:00pm
Aviation Museum, International Terminal
San Francisco International Airport

Background

Vehicles and equipment operated by airport tenants, service providers and employees result in greenhouse gas and air pollutant emissions of global and regional concern., Emission sources include airside ground support equipment, passenger services, cargo and freight operations, and delivery vehicles. New technology and funding options are available, such as alternative fuels, low-emission vehicles, and emission control devices. Airport operators will benefit from increased knowledge of current and pending regulatory mandates, available technologies including operational experience, and available funding. **Join us for this FREE workshop and expo!** A registration form is included on the back of this notice.

Preliminary Workshop Agenda (main topics and organizations making presentations)

Workshop overview

Policies and Regulations:

- Local airport regulation overview: SFO, OAK, SJC, SAC, FYI
- Overview of state on-road and off-road rules and relevance to airport stakeholders – California Air Resources Board

Vehicle Technology Presentations

Technology spotlights – representatives from AFV upfitters and dealers, alt fuel providers, GSE manufacturers/dealers, retrofit device manufacturers

VEHICLE EXPO/LUNCH

Best Practices

- Experiences and lessons learned from fleets using clean vehicles
